## PROFILE

Experienced Selenium Java Tester with over 2+ years in automation and manual testing. Proficient in Selenium WebDriver, TestNG, JUnit, Cucumber, Java, and OOPs. Also skilled in using Tosca and UiPath to enhance testing efficiency and accuracy.

## SKILLS

**Technical:** Java, C++, Python, SQL

**Tools:** Selenium WebDriver, UiPath, TOSCA, Maven, TestNG, JUnit, Cucumber, Git, GitHub, Jira

## EXPERIENCE

CAPGEMINI

Pune, India

**Senior Software Analyst**

2024 – Present

- Engineered and optimized Selenium WebDriver scripts in Java, reducing manual testing by 70% and enhancing test coverage and production defects by more than 45%.
- Leveraged TestNG and Maven for test execution and management, generating 20+ reports and communicating findings, improving test efficiency by 70% per execution.
- Executed 500+ testcases, diagnosed defects and implemented Page Object Model for scalable scripts.
- Trained junior software testers in advanced automation techniques using Java-based solutions which empowered them toward achieving independent status quickly within two weeks after initial training periods.

**Software Analyst**

2022 – 2024

- Automated 40+ scripts monthly using Tosca for the Customer Care Centre system and conducted regression testing by maintaining and executing over 700 test cases, achieving a 92% test coverage.
- Reduced regression testing workload by 67%, saving 4,333 hours annually and cutting costs by \$18,965 per year.
- Identified and reported over 100+ bugs, facilitating swift resolutions and achieving 27% cost savings through early defect detection.
- Validated system workflows through functional testing, created detailed documentation to ensure compliance and updated the test case repository, increasing test accuracy by 85%. Utilized test management tools like Multimedia Data testing centre and T-Portal to track execution, monitor progress, and generate 25+ reports every release.

## EDUCATION

Gondwana University

2018 – 2022

**Bachelor of Engineering** in Computer Science

CGPA:9.65/10.0

CBSE University

2017 – 2018

**Higher Secondary Education** in Science

CGPA:8.77/10.0

## PROJECTS

**T-Portal Ticket Automation System**

- Engineered a UiPath script to automate data extraction from Excel, interact with web interfaces, retrieve Ticket IDs, implemented validation checks, screenshot capture and executed a macro for email generation.
- Reduced task completion time from 30 minutes to just 3 minutes per ticket, minimized errors by 90%, and ensured accurate data handling for 50 ticket requests daily.

## ACHIEVEMENTS

- Received the **Rockstar Award** at Capgemini for exceptional performance and significant contributions.
- Achieved an **Exceptional Rating** for consistently exceeding expectations and delivering high-quality results.
